

This folder contains three STATA datasets and a do file to replicate the results in Genakos and Valletti, "Evaluating a decade of mobile termination rate regulation", *Economic Journal* (*forthcoming*).

You will need to download the datasets in a folder and then to set the directory to this folder (for example, `cd "C:\data"`), so that STATA can load the files. Then you simply run the do file.

The data has been anonymised for confidentiality reasons.
